Blood Work Requirements

Prior to performing the EEG, it is necessary that we obtain certain laboratory studies to rule out any underlying medical conditions. **If you have had any blood work done within the past 18 months, please have a copy mailed or faxed (310-277-7723) to our office.** If not, Dr. Emory may ask that you obtain blood test results prior to your EEG appointment.

The requisition minimally includes:

- a) Comprehensive metabolic panel
- b) CBC with differential
- c) Thyroid function (T-3 uptake, T-4 total)
- d) TSH level

There may be additional hormonal values requested.
